COGNITIVE REHABILITATION MANUAL: TRANSLATING EVIDENCE-BASED RECOMMENDATIONS INTO PRACTICE

Acrm Publishing. Paperback. Book Condition: New. Paperback. 154 pages. Dimensions: 10.9in. x 8.5in. x 0.5in. The Cognitive Rehabilitation Manual; Translating Evidence-Based Recommendations into Practice is a significant contribution to the field of brain injury rehabilitation. This landmark volume is a guide for clinicians to effectively deliver evidence-based rehabilitation interventions in everyday clinical practice. Never before has research outcomes been made so accessible for use in everyday clinical work. This vital volume raises the bar in cognitive rehabilitation by aiding clinicians in delivering high-quality, empirically-supported interventions to improve the lives of patients. Based on the series of evidence-based reviews of the scientific literature in cognitive rehabilitation conducted by Keith Cicerone, PhD, ABPP-Cn and colleagues, and published in the Archives of Physical Medicine and Rehabilitation, these evidence-based reviews identify high-quality research studies that support the use of rehabilitation interventions in a number of cognitive domains including attention, memory, language, visuospatial abilities, social-communication skills and metacognitive functions. The Cognitive Rehabilitation Manual fills provides step-by-step instructions for the interventions recommended. This Manual is an essential tool for any rehabilitation professional who regularly provides cognitive rehabilitation services. The Manual is ideally suited for clinicians who have had some formal training in cognitive rehabilitation, and who have experience working with individuals with brain injury (e. g. , traumatic brain injury, stroke). The interventions described can be readily used by occupational therapists, speech and language therapists, psychologists, and other rehabilitation professionals. The Cognitive Rehabilitation Manual; Translating Evidence-Based Recommendations into Practice was created by the Brain Injury Interdisciplinary Special Interest Group (BI-ISIG) of the American Congress of Rehabilitation Medicine (ACRM) is committed to fostering the use of empirically supported interventions to improve the lives of individuals with brain injury. A series of reviews, which are published in the Archives of Physical Medicine and Rehabilitation (Cicerone et al. , 2000);...
